CONTENTS OF VOL. 62 Nos 1–6

NUMBER 1—JULY

PART A

PAGE

Quasi-static indentation cracking of thermally tempered soda–lime glass with spherical and Vickers indenters
By M. Munawar Chaudhri and M. A. Phillips 1

Chi-phase precipitation in ion-irradiated molybdenum–rhenium alloys
By R. A. Erck and L. E. Rehn 29

The interaction of superdislocations and a coherent twin boundary in ordered Cu_3Au during *in situ* deformation in a transmission electron microscope
By F. D. Tichelaar and F. W. Schapink 53

On the configuration of superlattice dislocation pairs in the ordered $L1_2$ structure
By M. Feller-Kniepmeier and G. Scheunemann-Frerker 77

Dislocation mobility for non-basal glide in ice measured by *in situ* X-ray topography
By T. Hondoh, H. Iwamatsu and S. Mae 89

Hillock formation in InP epitaxial layers: a mechanism based on dislocation/stacking fault interactions
By R. Gleichmann, C. Frigeri and C. Pelosi 103

The energy of an array of dislocations: implications for strain relaxation in semiconductor heterostructures
By J. R. Willis, S. C. Jain and R. Bullough 115

TEM *in situ* deformation study of the interaction of lattice dislocations with grain boundaries in metals
By T. C. Lee, I. M. Robertson and H. K. Birnbaum 131

PART B

Papers from the 21st Chelsea Conference on Amorphous and Liquid Semiconductors

Editorial 1

Foreword by Professor Sir Nevill Mott 3

Low-temperature transport and recombination in a-Si:H
By R. Stachowitz, W. Fuhs and K. Jahn 5

PAGE

The influence of electrode shape and hydrogen dilution of SiH_4 on the optical properties of glow-discharge hydrogenated amorphous silicon
By M. MEILING, W. LENTING, J. BEZEMER and W. F. VAN DER WEG.... 19

An evaluation of phase-shift analysis of modulated photocurrents
By R. BRÜGGEMANN, C. MAIN, J. BERKIN and S. REYNOLDS 29

Frequency-resolved photoluminescence spectroscopy of a-Si:H, a-P_2Se, a-P_3Se, and c-P_4Se_3
By M. BORT and D. WOLVERSON

Raman-backscattering studies on amorphous hydrogenated silicon–germanium alloys
By M. B. SCHUBERT and G. H. BAUER..... 59

Experimental determination of plasmon energies from X-ray excited selenium Auger peaks in chalcogenide glasses of the type $Ge_xSe_y(\alpha)_z$ [α = Bi, Ga, Sb]
By B. R. ORTON, G. SAFFARINI, J. GORGOL and J. C. RIVIÈRE..... 71

Distribution of gap states in a-As_2Se_3
By G. J. ADRIAENSSENS..... 79

Effects of the emitter conductivity on the electrical behaviour of an a-Si:H/c–Si HBT
By O. BONNAUD, M. SAHNOUNE and A. EL GHARIB 89

NUMBER 2—AUGUST

PART A

Editorial announcement..... 155

An *in situ* electron microscope investigation of the icosahedral-to-decagonal quasicrystalline transformation in Al–20 at.% Mn
By D. H. KIM, K. CHATTOPADHYAY and B. CANTOR 157

Annealing behaviour of α-induced defects in tantalum studied by positron annihilation
By P. M. G. NAMBISSAN and P. SEN..... 173

High-resolution electron microscopy image contrast at the $CoSi_2$/Si(111) interface
By A. F. DE JONG and C. W. T. BULLE-LIEUWMA..... 183

Plastic deformation of gallium antimonide single crystals: yield stresses, activation parameters and dislocation structures
By M'BAREK OMRI, JEAN-PIERRE MICHEL and AMAND GEORGE..... 203

On the transition between the C and B kinetic regimes for grain-boundary diffusion
By I. A. SZABÓ, D. L. BEKE and F. J. KEDVES..... 227

PAGE

Characteristics of vacancy complexes in binary alloys
By G. Bérces and I. Kovács 241

On the high-temperature stress-induced spreading of superlattice intrinsic stacking faults in γ' nickel-based single crystals
By Ph. Lours, A. Coujou and B. de Mauduit 253

PART B

Editorial 99

Obituary notice 101

Structural and transport properties of the $Zn_{1-x}Cu_xAl_2O_4$ and $Ga_{1-x}Fe_xNiCoO_4$ systems
By M. N. Khan, A. Memon, C. A. Hogarth, A. Ahmed, B. A. Mulla and V. S. Darshane 103

The relationship between platelet size and the frequency of the B infrared absorption peak in type Ia diamond
By S. G. Clackson, M. Moore, J. C. Walmsley and G. S. Woods 115

Kinetics of formation of a surface enriched layer in an isotopic polymer blend
By R. A. L. Jones and E. J. Kramer 129

A point dipole model for the spread of activation energies in glassy dielectrics
By J. O. Isard 139

On the stability of random cubic alloys in the framework of pair potentials
By G. J. Ackland and V. Vitek 149

Direct evaluation of chemical potentials in substitutional solid solutions from Monte Carlo simulations
By S. H. Lim, G. E. Murch and W. A. Oates 159

Thermodynamic properties of binary alloys from Monte Carlo simulations
By S. H. Lim, M. Hasebe, G. E. Murch and W. A. Oates 173

The structural, chemical and compositional nature of amorphous silicon carbide films
By S. E. Hicks, A. G. Fitzgerald, S. H. Baker and T. J. Dines 193

Electronic and optical properties of a-$Si_{1-x}C_x$ films prepared from a H_2-diluted mixture of SiH_4 and CH_4
By S. H. Baker, W. E. Spear and R. A. G. Gibson 213

Temperature dependence of molecular relaxation rates and of viscosity of glass-forming liquids
By K. Pathmanathan and G. P. Johari 225

Electron energy-loss studies of Fe–Cr–Mn oxide films
By P. N. Rowley, R. Brydson, J. Little and S. R. J. Saunders 229

Book reviews 239

NUMBER 3—SEPTEMBER

PART A

PAGE

Computer simulation of de-mixing in solid solution oxides
By LING ZHANG and G. E. MURCH 267

Dislocation dynamics in anisotropic piezoelectric crystals. III. Elliptical dislocation loop
By KAZUHITO SHINTANI and SITIRO MINAGAWA 275

Transmission electron microscopy study of the interfacial reactions in gold-based contacts to gallium arsenide
By TAEIL KIM and D. D. L. CHUNG 283

60° dislocations in (001) GaAs/Si interfaces
By J. G. ZHU and C. BARRY CARTER 319

Structure and formation of domain boundaries in topologically close-packed structures
By M. KHANTHA, D. P. POPE and V. VITEK 329

R-curve behaviour in a macro-defect-free cement paste
By YIU-WING MAI, B. BARAKAT, B. COTTERELL and M. V. SWAIN 347

PART B

Electronic and structural properties of amorphous semiconducting carbons prepared by the thermal decomposition of sulphanilic acid in the solid state
By S. A. ROULSTON, L. J. DUNNE, A. D. CLARK and M. F. CHAPLIN 243

Preparation and optical absorption spectra of a new type of artificial semiconducting material: band-edge-modulated a-$Si_{1-x}N_x$:H films
By CHISATO OGIHARA, HIROSHI OHTA, MASAAKI YAMAGUCHI and KAZUO MORIGAKI 261

A structural model of hydrogenated amorphous silicon
By V. DRCHAL and J. MÁLEK 271

Tight-binding calculation of the solute–dislocation interaction energy in nickel: effect of atomic relaxation
By TETSUMORI SHINODA, KINICHI MASUDA-JINDO and TOMMO SUZUKI 289

The elastic behaviour of indium under pressure and with temperature up to the melting point
By S. C. FLOWER and G. A. SAUNDERS 311

Cathodoluminescence determination of the temperature rise in CdS under an electron beam spot
By S. ACHOUR 329

On the composition dependence of undercooling in binary alloy melts
By P. RAMACHANDRARAO and K. S. DUBEY 337

Book reviews 349

NUMBER 4—OCTOBER

PART A

PAGE

Some important similarities between the behaviour of solids and the behaviour of liquids
By M. J. MARCINKOWSKI 363

Many-body anharmonic interactions in Ag and Ni
By M. ZOLI 377

A high-resolution electron microscopy study of microstructure of ZnS powder phosphors with different dopants
By ZHANG SHUYUAN, GUO CHANGXIN, LI BILIN and TAN SHUN 387

Heavy-ion irradiation tracks in zircon
By L. A. BURSILL and G. BRAUNSHAUSEN 395

High-resolution electron microscopy of neutron-irradiated-induced dislocations in SiC
By TOYOHIKO YANO and TAKAYOSHI ISEKI 421

***In situ* observations of dislocation motion and relevant surface phenomena in Eu_2O_3**
By X. G. NING and H. Q. YE 431

Correlation between the energy and structure of grain boundaries in b.c.c. metals. II. Symmetrical tilt boundaries
By D. WOLF 447

Diffusion-induced migration of grain boundaries and liquid films
By T. K. CHAKI 465

PART B

Microscopic structure of the alkali metal–alkali halide solutions in the metallic regime. A neutron-scattering investigation
By J. F. JAL, C. MATHIEU, P. CHIEUX and J. DUPUY 351

Diffuse scattering, size effect and alloy disorder in ternary and quaternary III–V compounds
By F. GLAS, C. GORS and P. HÉNOC 373

Heterogeneous ordering in superlattice alloys
By KAZUHIRO MITSUI, YOSHINAO MISHIMA and TOMOO SUZUKI 395

Atomic structure of ion-sputtered Fe/Ti multilayers studied by HREM
By A. BOURRET and J. L. ROUVIÈRE 415

Dissociated 60° dislocations in CdTe studied by high-resolution electron microscopy
By PING LU and D. J. SMITH 435

Book reviews 451

NUMBER 5—NOVEMBER

PART A

Page

The prediction of correlation factors and motion energies for diffusion of transition metal ions in CoO and NiO
By J. H. HARDING, M. J. L. SANGSTER, A. M. STONEHAM and R.-J. TARENTO 473

Quadrupole terms in defect energies in transition metal oxides
By A. M. STONEHAM, M. J. L. SANGSTER and J. H. HARDING 487

Correlation factor for diffusion via sublattice vacancy mechanism in the $L1_2$-type ordered alloy
By Y. ITO, S. ISHIOKA and M. KOIWA 499

Third-harmonic studies of nonlinear anelasticity and determination of higher-order elastic constants in Mn–7 at.%Cu
By K. MIURA and T. MIURA 511

Atomistic study of $\frac{1}{3}\langle\bar{1}\bar{1}23\rangle\{10\bar{1}1\}$ dislocations in h.c.p. crystals. I. Structure of the dislocation cores
By H. NUMAKURA, Y. MINONISHI and M. KOIWA 525

Atomistic study of $\frac{1}{3}\langle\bar{1}\bar{1}23\rangle\{10\bar{1}1\}$ dislocations in h.c.p. crystals. II. Motion of the dislocations
By H. NUMAKURA, Y. MINONISHI and M. KOIWA 545

Heterogeneous nucleation of In particles embedded in an Al matrix
By D. L. ZHANG and B. CANTOR 557

PART B

Nucleation issues in solid state amorphization
By R. J. HIGHMORE 455

Sphere and distance models for binary disordered systems
By J. BLÉTRY 469

Electron and hole transport in compensated amorphous silicon
By D. M. GOLDIE, W. E. SPEAR and E. Z. LIU 509

Doping effects of aluminium on the properties of hydrogenated amorphous silicon–carbon alloy films prepared by magnetron sputtering
By N. SAITO, Y. TOMIOKA, H. SENDA, T. YAMAGUCHI and K. KAWAMURA 527

The effect on recombination in amorphous semiconductors of transitions between localized states
By M. ABRAHAM and V. HALPERN 537

PAGE

High-pressure studies on the electrical resistivity of As–Te glasses
By S. S. K. TITUS, S. ASOKAN, R. RAMAKRISHNA and E. S. R. GOPAL .. 553

Book reviews 557

Erratum 561

NUMBER 6—DECEMBER

PART A

Transmission electron microscopy of dislocations in $YBa_2Cu_3O_{7-x}$ deformed plastically at high temperatures
By T. YOSHIDA, K. KURODA and H. SAKA 573

Transmission electron microscopy of dislocations and grain boundaries in Bi–Pb–Sr–Ca–Cu–O superconductors deformed at 800°C
By T. MURASE, K. KURODA, K. SUZUKI and H. SAKA 583

Relations between tracer diffusion coefficients and phenomenological coefficients in a binary substitutional alloy
By A. B. LIDIARD, G. E. MURCH, Z. QIN and LING ZHANG 595

Comparative study of the microstructure of the interphases in two SiC fibre/lithium aluminosilicate matrix composites
By C. PONTHIEU, M. LANCIN and J. THIBAULT-DESSEAUX 605

Characterization in heavy-ion damage in ruthenium II. Cascade collapse
By W. J. PHYTHIAN, C. A. ENGLISH, D. J. BACON and B. L. EYRE 617

Dislocation structures produced by low-amplitude fatigue of copper single crystals at 77 K
By L. BUCHINGER, S. STANZL and C. LAIRD 633

Strain contrast of coherent precipitates in bright-field images under zone axis incidence
By S. MATSUMURA, M. TOYOHARA and Y. TOMOKIYO 653

PART B

Commensurate and incommensurate structures in rapidly solidified $V_{40}Co_{43}Si_{17}$
By GANGHUA LU and Y. C. FENG 563

Structure of the icosahedral Al–Mn–Si alloys: decoration in three-dimensional space of a six-dimensional cubic I lattice
By A. LE LANN 577

The nitrogen content of type Ib synthetic diamond
By G. S. WOODS, J. A. VAN WYK and A. T. COLLINS 589

Photoluminescence microtomography of diamond
By W. J. P. VAN ENCKEVORT and E. P. VISSER 597

PAGE

Coarsening in the two-dimensional soap froth and the large-Q Potts model: a detailed comparison
By J. A. GLAZIER, M. P. ANDERSON and G. S. GREST 615

Solid sodium particles in aluminium
By A. HORSEWELL 647

The effects of both deviation from stoichiometry and boron on grain boundaries in Ni_3Al
By I. BAKER, E. M. SCHULSON, J. R. MICHAEL and S. J. PENNYCOOK... 659

Book reviews 677

Errata and Corrigenda 681

Subject index 685

Index of authors (with titles) 691
